

# **Sicam Review 2023**

## **Decor And Product Highlights**

### **Our Top Designs from Sicam**

#### **Riva**

Riva offers limitless design and combination options. The natural veneer character, balanced and unobtrusive, makes the decor modern and durable. Riva is a sought-after alternative to the oak decor trend and is equally pleasing, which supports its longevity.

**Riva offers limitless possibilities!**

#### **Sydney**

Naturally versatile! The stone decoration consists of multi-colored natural stone fragments. It is understated and timeless with a sense of natural authenticity. Sydney can be used to great effect over large areas but can also be used on countertops or a modern look.

**Naturally versatile and timeless!**

#### **Bilbao Walnut**

Bilbao Walnut brings coziness and comfort to living and working. In this case, less is more. Bilbao Walnut is a fine, linear walnut decor that subtly shines with less distinctive features. Very homogeneous, it works well as a large, optical surface. This application emphasizes the full, curved effect that spreads across the decor like a gentle wave.

**Less is more – more effect!**

#### **Sunda**

This linear decor is based on the demand for a lamella or slatted look. Without hard lines, it appears very two-dimensional. This is achieved by placing fiber strips in all variations and colors side by side. The decor is a very contemporary and progressive interpretation of the stripe trend.

**Sunda is versatile and appeals to many markets!**

#### **New product Fineflex Structure** **“Haptic in a new dimension”**

The market demands versatility in design; whether through decorative surfaces, metallic effect films or enhanced tactile sensations. From customers to consumers, these have been constant requests for years. With Fineflex Structure from Schattdecor and Fine Decor, we have taken up the theme of structure and given it a new dimension. In the highlight color Pearl Bronze (metallic), the result is ultra-modern, both visually and haptically.

### **Sicam colors available with edge**

In cooperation with Rehau, we offer our customers with the complete package from the beginning of their product development. Our Sicam colors have available matching edgebands so our customers can start product development immediately. The complete package is available in all collection colors: Shell White, Pearl Beige, Pearl Gold, Pearl Bronze, Sky Blue, Night Blue Galaxy and Space Black.
