

## **Press Release**

**Sales cooperation with Hans Schmid GmbH & Co. KG**

### **Schattdecor expands product portfolio**

The surface specialist, Schattdecor, is expanding its range of products and services, true to its company motto "One Source. Unlimited Solutions." with two new products: MFS-Touch and MFS-Tec.

The innovative MFS-Touch finish not only ensures an on-trend look with a modern design aspect, but also durability and user-friendliness. In addition to their own products from the Schattdecor product portfolio, they will now also be offering products from Hans Schmid Gronau (HSG), by continuing to respond to the high demand for innovative, modern surfaces by providing an anti-fingerprint effect in a velvety, super matte finish.

This special finish, in the form of an ingenious coating developed by HSG, increases durability and scratch resistance, while also providing a new haptic experience for surfaces on tabletops or kitchen cabinet fronts.

The newly developed product, MFS-Tec, makes our décors suitable for outdoor use. HSG's specially developed coating protects the substrate printed with our décor from UV rays and the weather. Schattdecor's wood, stone, fantasy, and solid décors can now be used outdoors, offering customers exciting and innovative choices.

The application for surfaces with MFS-Tec in the medical or public sector is an intriguing consideration: The special coating is also resistant to chemical detergents and is therefore ideal for these heavily used surfaces. The décors can be optimally used in personal spaces, such as bathrooms and kitchens, where hygiene plays a major role.

Expanding their 2022 sales cooperation with the accrual of two additional innovative and contemporary components into the overall package of "One Source. Unlimited Solutions.", Schattdecor, together with HSG, offers discerning customers, worldwide, an additional service from a single source.
